2016 US Presidential Election - Follow the Campaign with Thomson Reuters

Reuters is committed to covering this year's U.S. presidential election campaign unlike ever before. With high-profile journalists on the ground, deep financial expertise, a global perspective and innovative polling data, Reuters is poised to offer unmatched multimedia coverage.

What to expect:

- Candidate profiles, interviews and analysis from the campaign trail.
- Daily opinion pieces from leading experts.
- Live video feeds of campaign events.
- Real-time updates through Reuters live blog Tales from the Trail.
- Industry-leading polling, with over 11,000 surveys per month on every major issue from poverty to healthcare to gun control. Over 45,000 exit poll interviews on Election Day 2016.
- Analysis of the election's affect on global economy and markets.
- Assessments of how foreign policy decisions will reverberate inside and outside the U.S.
- Illumination of American culture and its collective thinking.

How to Access:

- The US Election 2016 App on Eikon by entering "US Election 2016" in the Eikon Answer Box and selecting the app.
- On Thomson Reuters Eikon, enter VOTE and US into the news search field. On Thomson ONE, enter RT/ VOTE and RT/US.
- A live blog featuring news, videos, photos, tweets and commentary.
- Updates on the latest developments via reuters.com and the Reuters app.
- Reuters TV will provide insightful coverage that's relevant to you, in any duration. Download on Apple or Android devices.
- Follow us on Twitter @ReutersPolitics.

Data Item Browser App

We are pleased to introduce a content discovery tool for Desktop, Web and API users of Eikon.

What's Included:

The Data Item Browser allows you to lookup data items and their definitions. It can also be used to browse the entire data offering for a given instrument or security.

- Browse for real-time, fundamental and referential content
- Find data using data-item filters and keyword search
- Copy and use data-items in Excel and API requests
- Learn about data-items, their definitions and their properties.
- View available data for a given security.

How to Access: Search for DIB or Data Item Browser in the main command line. This will also be available via the App Library and right-click menu.

Available On: Desktop, Web Access.

Agriculture – Expanded lanworth satellite imagery menus allow easier crop comparisons and forecasts

Take advantage of our exclusive new live charting of satellite-based vegetation data from satellite imagery. The new menus provide you with up-to-date access to proxies for crop health over all global crop areas and allow you to see exact spatial scales. This data is exclusive to Thomson Reuters Eikon, allowing you to stay ahead of your market rivals. As extreme weather becomes impacts the price behavior of agricultural commodities, satellites are increasingly useful in predicting yields and comparing history.

COMMODITIES CONTENT HIGHLIGHTS

New weather risk explorer tool to view what-if scenarios for your markets

Take a look at the exclusive new Weather Risk Explorer tool in Thomson Reuters Eikon. This useful app allows you to analyse how 50 different weather forecast scenarios will impact supply, demand and prices in your market. Use it to perform what-if analysis in an intuitive way, understand uncertainty and make better informed trading decisions. The Weather Risk Explorer lets you interactively analyse weather risks and how these will impact on supply, demand and prices. The tool is exclusive to Thomson Reuters, giving you the deeper market insight needed to outperform your market rivals.

FIXED INCOME CONTENT HIGHLIGHTS

New 'CDS Dashboard' App released

The CDS Dashboard app provides a premium intraday pricing offering for CDS indices and their constituents, as well as for CDS single names in general. From the App, you will be able to navigate to the CDS Index Views and CDS Single Name Views to find more fundamental details, all quotes, etc

Clients can now automatically access the new CDS Dashboard app from the Eikon Command Line by typing "CDS Dashboard" or the app short code "CDSD".

Click on a CDS index to load its constituents.

New RICs to cover CCIL Index for Government, State Development and all Sovereign bonds

Effective 20 July 2016, new RICs became available to cover Clearing Corporation of India Limited (CCIL) Index for Government Bonds (GSEC), State Development Bonds (SDL) and CCIL All Sovereign Bond Index (CASBI) data. Prior to this enhancement, historical data was not available to clients for further analysis and/or charting. This would help in charting and analysis for the liquid segment of bond market namely SDL and GSEC.

MSRB Real-Time Logical Records

We are happy to announce that in July, several enhancements went live on Municipal Securities Rulemaking Board (MSRB). The release took effect for over 500,000 =MSRB RICs on production and was released with zero customer impact.

- Addition of source driven new trade transparency flags
- Addition of a new daily active records chain
- Addition of new logical CUSIP code FID

How to access: This content can be accessed from the page <MSRBBONDS>

Bonds purchased by ECB under the CSPP

We started publishing the chains with bonds that National Central Banks (NCB) had bought as a part of Corporate Sector Purchase Programme (CSPP) on behalf of the Eurosystem. List of corporate securities is updated on a weekly basis and it contains the full universe as well as separate chains with bonds held by relevant National Central Banks. This is key data for our clients as the ECB's Corporate Sector Purchase Program (CSPP) is a new monetary policy initiative to boost the EuroZone economy and move inflation closer to their 2% target. Client gain access to corporate debt instruments purchased under the CSPP that are made available for securities lending. We will also publish the total volume of CSPP holdings. Data is available on Eikon page. **Products supported:** Eikon, DSS, DSOS.

EXCHANGE NEWS

World Federation of Exchanges publishes H1 2016 Market Highlights

The World Federation of Exchanges ("WFE") published on July 25, 2016 its H1 2016 Market Highlights.

Key highlights:

- **Cash equity markets** experienced a decline of 24.0% in terms of value traded, and 6.9% in terms of number of trades in the first half of 2016 compared to the same period in 2015. These declines largely reflect a slow-down in trading activity in the Asia-Pacific region, particularly mainland China.
- **FX and commodities exchange traded derivatives** led a 1.4% rise in all exchange-traded derivatives.

According to the WFE's half-year statistics, **the key trends of the year** thus far are as follows:

- **Global market capitalization** decreased 9.4% from H1 2015, to reach USD 67.2 trillion compared with USD 74.2 trillion. Asia-Pacific accounted for USD 4 trillion of this decline, ending the half year at USD 23.3 trillion, down 14.9% from the end of the first half of 2015. EMEA exchanges were down USD 1.8 trillion (a decline of nearly 10%) followed by the decline of USD 1.1 trillion in the Americas (nearly 3.6%). The USD 29.14 trillion market capitalization as at end June 2016 in the Americas is, however, up slightly (4.3%) on the number at end 2015.
- **The value of share trading** decreased 24.0% worldwide to USD 44.9 trillion in the six-months to June 2016 compared with USD 59.2 trillion in the same period in 2015. Most of the decrease is attributable to the decline in trading activity in the Asia-Pacific region where the value of share trading decreased 47.0% from that seen in the first half of 2015. The Americas bucked this trend, with value-traded in H1 2016 up 2.3% on H1 2015.
- **Total number of trades** in H1 2016 decreased 6.9% from H1 2015. As the Asia-Pacific region accounted for 66% of all trades in the first half of 2015 this decline is entirely due to a 20.6% drop in the number of trades in this region. Both the Americas and EMEA experienced an increase in number of trades in H1 2016 compared to the same period in 2015 (up 22.9% and 8.8% respectively).
- **IPOs and investment flows:** Total new listings in the first half of 2016 (including IPOs) were down 48.9% overall compared to the first half of 2015. Similarly, investment flows channeled through exchanges declined by nearly 31.4% in the first half of 2016 compared to the same period of 2015. Within this figure, capital raised through IPOs (which accounted for just under 10% of total capital raised) decreased by 64.4% and capital raised by already listed companies decreased by 24.1%.
- **Exchange Traded Derivatives (ETD)** volumes (as represented by number of contracts traded) ended this six-

month period 1.4% up compared to the first half of 2015. This was fuelled mainly by increases in the number of commodity and currency derivatives traded, up 46.8% and 26.1% respectively, versus the same period in 2015.

U.S. SEC approves IEX as national stock exchange, symbol rollout scheduled

The U.S. Securities and Exchange Commission has granted the hotly debated request by alternative trading group IEX Group Inc to launch a new U.S. public stock exchange. IEX will commence a symbol-by-symbol roll-out on August 19th, concluding on September 2nd.

RISK & REGULATORY SOLUTIONS HIGHLIGHTS

COUNTRIES OF RISK - LEADING ENTITY RISK SOLUTION

Thomson Reuters has enhanced entity risk offering to help financial institutions, including custodian banks, regional banks and fund administrators, better identify and manage their portfolio risk and regulatory reporting requirements. As part of the enhanced offering, customers are now able to measure their aggregate exposure to an entity's countries of risks. The solution is powered by StarMine's algorithm and uses Thomson Reuters entity and fundamentals data as well as GDP data from the IMF. It makes adjustments where appropriate to provide full transparency into the factors used to create the weightings that drive the algorithm.

"We are seeing a significant increase in demand for entity content by our clients and solutions like our Countries of Risks empower and help them to better understand their true exposure to an issuer and their complex global affiliations," said Debra Walton, managing director, Enterprise Content at Thomson Reuters. "Our Countries of Risks offering also highlights our commitment to integrate the breadth of content across our organization to deliver innovative solutions to professionals globally. We are delighted that we are able to leverage fundamental and economic data on issuers and powerful StarMine Analytics to enhance our Entity Risk solution."

"In today's complex and interconnected world, firms need the ability to measure and report risk in investment portfolios as it relates to issuing entities, sectors, asset classes, and countries," said Tim Lind, global head of middle office at Thomson Reuters. "Our new Countries of Risks offering addresses this critical need by providing the linkage between entities, securities, and different dimensions of risk."

Entity data is the map that connects the total exposure of securities and holdings to issuers and the concentration of assets by industry sector or countries of risk. Thomson Reuters Entity Risk helps clients measure their aggregate exposure by providing visibility of the organizational structures of core entities, their subsidiaries, joint ventures and affiliates in the hierarchy view. It covers a growing universe of more than 1 million entity records from auditable sources including exchanges, company registrars, 10K filings, regulators, annual reports and prospectuses – all presented in a concise, manageable and user-friendly mapped format. The data is collected and maintained by a global team of hundreds of market analysts covering 250 markets with a clear focus on the highest quality and efficiency.

DIAGNOSTIC TOOL - BE COMPLIANT AND REDUCE REGULATORY DATA COSTS

Thomson Reuters in conjunction with our partners and customers launched a revolutionary new diagnostic tool that allows customers to determine their ability to:

- Comply with Basel, EMIR, Solvency II, MiFID, KYC, IFRS, AML and more
- Obtain a tailored report based on their role, function and company type
- PLUS gain an exclusive copy of the latest (not available elsewhere) market research on how to reduce costs and repurpose solutions to stay compliant

This tool is FREE of charge for any customer, contact and/or market practitioner to use and is located here: [Regulation Tool | Thomson Reuters](#)
