## New Features / Enhancements

1. Bug fix for the issue of missing “IncorporatedIn” and “DomiciledIn” relationship data in the API for Chinese organizations.
2. Corrections to the Atom feed pagination links to give accurate values for navigation.
3. Bug fix for a data discrepancy between Primary Quote and Primary Instrument on the UI and API.

## Known Issues

1. Occasionally matching returns error (500). In this case - please try again.
2. We are currently experiencing issues with the PermID.org Atom RSS feeds, particularly the Organization feed. Our support team are working on a resolution for this as a top-priority. The bulk download files may be used as an alternative way to retrieve data in the interim.
